GRADUATION PROJECT

YOUR TASK

- Develop a web application
- use all technologies that you've learnt during the training
  - Spring Boot
  - SQL database
  - React frontend
  - Git
  - CI / CD

DIVISION OF WORK

Brooke's law: Adding manpower to a late software project makes it later

DIVISION OF WORK

What is promising?

- Split work according to User Stories
- Pair & Mob-Programming at critical points
  - Project Setup
  - Layout/Design Framework

DIVISION OF WORK

What is problematic?

- Split work based on technologies (e.g. front-end / back-end)
- Split work based on phases (e.g. Design/Architecture/Implementation/Validation)

MINIMUM VIABLE PRODUCT

Get to a Minimum Viable Product as fast as possible: The "smallest" version of your software that can be used!

PROJECT IDEA 💡

How can you discuss various ideas?

- Problem statement
- Solution approach
- User stories for the minimum viable product
- Parallelization: How many user stories can be continuously developed at the same time?

EXAMPLE:

Problem statement

I don't see what my friends and other interesting people are experiencing in life.

Solution approach

- An app to share photos with descriptive texts.

MVP user stories

- Create photo with description
- Latest photos page
- Detail page with descriptive text

Parallelization

2-3

RULES 📕

- Use a planning tool: **Jira!!!**
- Give the trainers access to the Github repo
- Commit fast & often
- No pure "CSS" or "presentation" team members! Everybody has to work full-stack
- Techstack: Java, Spring Boot, SQL DB, JS / Typescript, React, CSS Framework (free of choice)
- Join the breakout rooms during core-times! (9:00 – 16:00)
- No unexcused absence! 🤒
- No copy-paste of projects from the internet

PRESENTATION 

- Dress to impress
- Don’t get stuck in talking about code 
  Storytelling & interactive elements are lovely 
- Every team member must speak! 
- 20-25 minutes per team  - 10-15 minutes feedback
- Take some time to make it pretty 
- Take some time to arrange who is talking when!

PRESENTATION 🎁

IDEAS FOR CONTENTS...

1. Who are you? What was your task?
2. Who did what? How did you work? Which tools did you use? 🧰
3. Show your results 👨‍🏫
4. What have been the challenges? 🌋
5. What have been your most important learnings?
6. We are proud of... 🦚

SCHEDULE 

FIRST DAY

- Each group creates at least one idea – more is still better! No idea? Describe a website / solution that you are frequently
- Don't start working "hands-on" without speaking to your trainer about your project idea!

FIRST/ SECOND DAY

- Presentation of ideas and decision (latest!) - give Lars a brief introduction (written)
- Planning
  - Develop concepts & prototypes (use wireframes / mockups with e.g. figma.com)
  - Prepare user stories
  - Design interfaces, ER diagrams, URL-Endpoints (Swagger?), components together
  - Setup Github environment – invite your trainers (**@largeger**)
- contact your trainer before starting coding!

THIRD DAY (AND ALL THE OTHER DAYS)

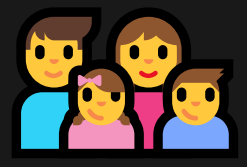

- ??:??: Group-internal standup / check-in
- 15:00: Check-out (all groups together) with Sezgin / Lars

02.08.2024 🚀

- 09:00: Dry-run presentation (with PMs and trainer)

06.08.2024: GRADUATION DAY

- 09:00 (?!?): Graduation ceremony 🎓 (Münster & Hannover)

TEAMS 

Please 🙏 - also help across team borders!

HANNOVER:

1. Markus, Ganna, Olena, Lahcene
2. Mazlum, Evgeniia, Philipp, Osama
3. Erwin, Sezgin, Mohannad

MÜNSTER:

1. Tillmann, Mededе, Mats, Yasin
2. Thorsten, Furkan, Esra, Roger
